

MorningBriefing.AI

“Turn information into clarity, Turn your day into a story”

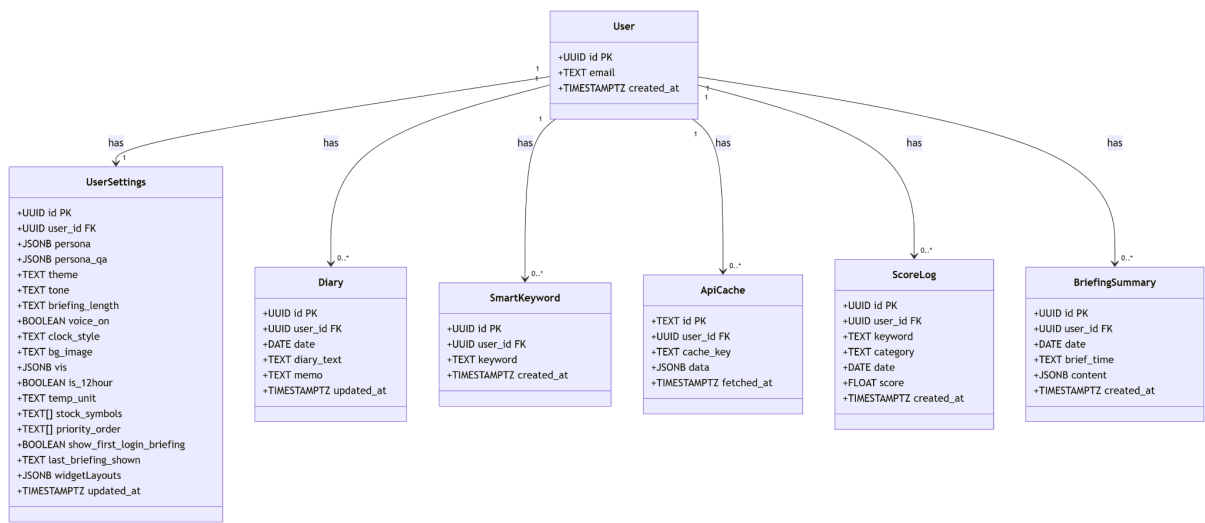

Data Design Document

Team: MorningBriefing.AI

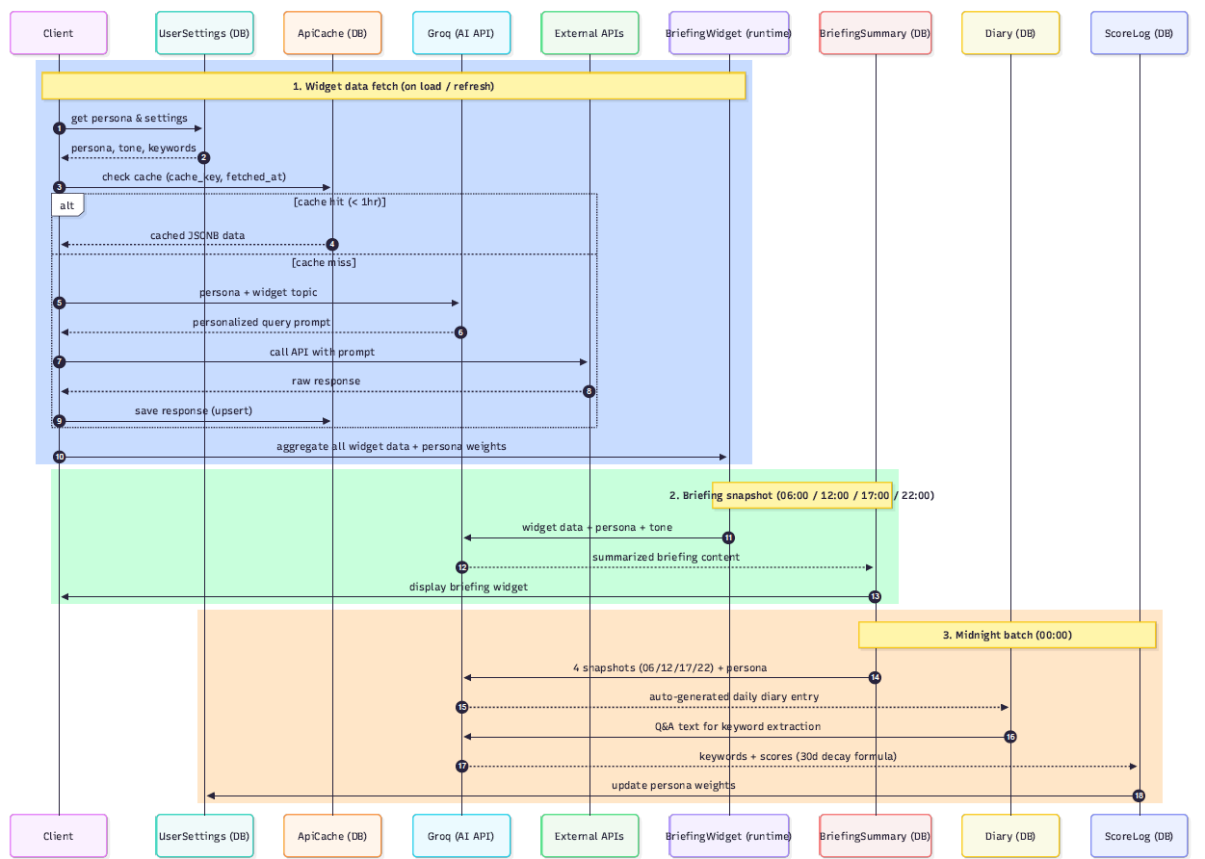

Name	SBU Email	Contribution
Minsoo Ahn	minsoo.ahn@stonybrook.edu	Infra/Supabase cloud setup, Persistent storage schema, External API integration.
Sungmin Choo	sungmin.choo@stonybrook.edu	Backend aggregation logic, Smart Keyword filtering, Dashboard core widget development.
Dahyun Kwon	dahyun.kwon@stonybrook.edu	Diary/Calendar interaction model, React component architecture, Frontend UI/UX implementation.

1. UML Class Diagram

The diagram below models the persistent data for MorningBriefing.AI. Each class maps to a table in our Supabase (PostgreSQL) database via an ORM-style mapping.

2. Sequence Diagram

3. Notes on Non-Obvious Names

Most class and attribute names should be self-explanatory. The following terms benefit from brief explanation:

- **UserSettings:** Stores each user's personalization and interface preferences, including persona settings, theme, briefing style, widget layout, and other dashboard options.
- **SmartKeyword:** Represents a custom keyword or topic selected by the user to generate personalized smart-widget content and relevant briefing results.
- **ScoreLog:** Records daily scores associated with user keywords and categories, which are used to track preference patterns and refine personalization over time.
